

BGS Pneumatic Brake Bleeder Set | 2 pcs.

- extracts the fluid from the system via the brake bleeding nipple
- allows brake bleeding or a complete fluid change in the brake system
- for easy one-hand operation using a standard pneumatic air connection
- universal design to fit most of reservoir tanks reservoirs and avoid splashing or contamination
- built-in acoustic suppressor for a quieter operation and a more comfortable working atmosphere
- 1 l refill bottle with adjustable swivel clamp keeps the reservoir tanks reservoir filled during the bleeding operation
- including a long bleeding hose (115 cm) and a suction hose (150 cm)
- provides wide range and flexibility compared to standard hoses

scope of delivery:
