

BGS Tyre Lever | with Plastic Protection Sleeve 535 mm

- for non-damaging assembling of tyres on aluminium rims
- optimized structure (reinforced, rounded, stump edges) to avoid damages on tyre carcass
- plastic protection sleeve prevents scratching of the wheel rim and also protects against slippage
- reinforced tyre walls on run-flat tyres and low profile tyres are significantly more rigid than the casing of conventional tyres
- using regular tyre levers may lead to tyre damage
- total length: 535 mm

Weight: 1,110 kg.
