

BGS Antifreeze Tester Hydrotemp

- robust and break-proof type
- for checking the radiator antifreeze quality
- usable for antifreeze/water mixture based on ethylene-glycol-(ethandiol)
- display accuracy: 0.5°C
- suction bulb made of elastomer is flexible at all times and guarantees function in all temperature ranges
- hydrostatic block prevents automatic discharge and retightening of air the display
- display is immediately stable
- non-drip suction tube
- all temperature twin measuring element, swivable 360°
- for direct reading
- measuring scale in Celsius
- measuring range 0 up to -40°C

Weight: 0,144 kg.
