

BGS Smoke Leak Detector

- to detect and locate leaks in automotive piping systems
- a wide range of applications are as varied as the faults and symptoms caused by leaks
- to solve problems efficiently and to shorten the diagnosis time considerably
- for power supply, the device is simply clamped to the vehicle battery and can thus be used in a mobile and flexible manner
- safety switch-off of the heating
- powder-coated sheet steel housing
- adding baby oil or mineral oil before use (not included in the scope of delivery)

suitable for leak testing of:

- intake tract
- exhaust gas and exhaust gas recirculation system
- crankcase and charge air system
- tank, activated carbon and fuel system
- urea (AUS 32) and additive system
- vacuum controls, as well as its controls and connections
- air conditioning system (low pressure, completely drained, flush if necessary)
- cooling water system
- wiper water system
- car body and windshield connections (detection of water ingress points and wind noise)
- power supply: 12 V (car battery)
- smoke volume: 15 - 20 l/min

scope of delivery:

- 1 smoke generator
- 1 fill bottle, 250 ml
- 1 fill bottle, 15 ml
- 1 venting adapter
- 1 conical plug, large
- 1 conical plug, small
- 1 conical plug, medium
- 1 smoke outlet hose
- 1 power supply cable
- 1 vacuum hand pump

- 1 crankcase adapter
- 1 valve tool
- 1 connection hose
- 1 hose clamp
- 24 sealing plugs

Weight: 5,062 kg.
