

BGS Vacuum Extraction Pump | 6 l

- for manual suction of liquids
- effortless suction by means of the vacuum principle
- clean, fast and easy suction, aspiration and draining of liquids
- suitable for lubricating oils, automatic transmission oil, coolant, brake fluid, water, low viscosity fluids
- with high quality pump body and reinforced pump head
- including different probes for various applications
- with integrated safety valve
- transparent container for checking the liquid level
- capacity: 6 liters

scope of delivery:

- 1 extraction tank with vacuum hand pump
- 1 dipstick oil extraction tube 5 mm
- 1 dipstick oil extraction tube 6 mm
- 1 extraction tube 8 mm
- 1 main extraction hose 10 mm

Weight: 2,770 kg.
