

BGS Exhaust Gas Counter-Pressure Tester

- for testing of the exhaust back pressure
- to be connected to oxygen sensor thread of the exhaust system or to flange of exhaust gas recirculation valve
- allows conclusions on blockages or constrictions, such as e.g. clogged catalysts or particulate filters, thereby preventing expensive repair costs due to damage to the turbocharger

scope of delivery:

- 1 adaptor for oxygen sensor thread M12 x 1.25
- 1 adaptor for oxygen sensor thread M18 x 1.5
- 1 flange adaptor for exhaust gas recirculation valve (EGR)
- 1 pressure gauge, 57 mm with two ranges in psi & kg/cm²
- 1 braided stainless steel casing hose, length 1.9 m

Weight: 2,474 kg.
