

EXPRESS hot air gun with piezo KIT

Express hot air gun with piezo ignition, with quick and easy temperature adjustment; 190 ° - 400 °. Used together with gas EX445.

The flat reflector nozzle is perfect for precision work where the airflow must be collected and centered. The round nozzle is particularly good if you need to shrink or heat, as the air flow is shaped so that the working temperature remains the same all the way around the workpiece.

With the Express hot air gun, you get a multifunctional tool that can be used on cables, shrink sleeves and PVC pipes. Loosen plastic sheets, adhesives, varnish and paint. Defrost sewers, water pipes, locks or loosen fixed screws and nuts. The work area is unlimited.

Weight: 0,450 kg.
