

BGS Hydraulic Cylinder Tool Set | with Pulling Spindles | for Diesel Injector Extractor | 17 t

- for controlled disassembly of stuck injectors
- hydraulic cylinder with collar nut is placed together with the special pulling spindles on a puller bridge to pull out the injectors
- to be used in combination with injector extractor | for BMW (BGS 8782) and a hydraulic pump
- working pressure: max. 700 bar
- hydraulic piston diameter: 30 mm
- hydraulic piston stroke: 16 mm
- Hydraulic cylinder diameter: 78 mm

scope of delivery:

- 1 hydraulic cylinder internal thread M16 x 1.5 and coupling nut M21 x 1.25
- 1 puller spindle nut M16 x 1.5
- 1 distance washer
- 1 puller spindle M25 x 1.0 internal thread (240 mm)
- 1 puller spindle M14 x 1.5 external thread (240 mm)
- 1 puller spindle M17 x 1.0 internal thread (240 mm)
- 1 puller spindle M18 x 1.5 internal thread (250 mm)
- 1 puller spindle M17 x 1.0 internal thread (315 mm)
- 1 puller spindle M14 x 1.5 external thread (315 mm)

Weight: 6,198 kg.
