

BGS Common Rail Return Pressure Diagnosis Kit | for Piezo Common Rail Injectors

- for testing the return flow pressure of common rail systems with piezo injectors from Bosch, VDO / Siemens and Delphi
- determined pressure values allow a condition assessment of the piezo injectors

scope of delivery:

- pressure gauge for Bosch and VDO Siemens Piezo-Injectors, measuring range: -1 to +15 bar
- pressure gauge for Delphi Piezo-Injectors, measuring range: -1 to +3 bar
- transparent body with drain valve for visual inspection for air bubbles, two quick couplings and drain hose
- connecting hose set for VDO Siemens Piezo-Injectors
- connecting hose set for Bosch piezo injectors
- connecting hose set for Delphi piezo injectors
- brass double cone

Weight: 1,238 kg.
