

BGS Automotive Relay-Tester | 12 V

- fast and easy to use test device for automotive relays
- suitable for most common relays (coil resistance $> 20 \Omega$) in vehicles with 12 V nominal Vage (max. 15 V)
- monitors the pin configuration, checks the proper function of the relay contacts and the time to close and open the contacts
- 2-color LED built into the tester provides information about the function of the relay

Weight: 0,287 kg.
