

BGS Pneumatic Injector Extractor

- for compressed air-assisted removal of particularly tight diesel injectors
- the diesel injectors are removed from the cylinder head by pneumatically generated impact effect
- coking and rust deposits are broken up and the injector will be released from sealing seat
- the extractor is screwed in directly to the fixed injector by using the corresponding adapter
- compact design
- high impact effect
- piston stroke: 38 mm
- lifting speed: 300 / 900 per minute
- connecting hose: Ø 12 mm
- torque: 600 Nm

Weight: 3,154 kg.
