

BGS Car Voltage and Current Tester | 1 - 48 V

- ideal for the diagnosis of electrical circuits on cars
- this meter is fast, accurate and safe to use
- is used to measure currents (directly to the fuse socket) and voltage
- current measurement: up to 30 A at 48 VDC (max. 10 sec.), accuracy: $\pm 1\%$
- voltage measurement: 1 - 48 VDC, accuracy: $\pm 1\%$
- working temperature: 0°C to 50°C
- storage temperature: -20°C to 60°C
- humidity: less than 70% RH (working)
- less than 80% RH (storage)
- max. height: 2000 m
- power supply: 1x 9V battery

scope of delivery:

- 1 voltage and current meter
- 2 alligator clips (1 red / 1 black)
- 1 voltage measurement cable with "cigarette lighter plug", length 950 mm
- 1 current measurement cable with fuse adaptor, length 600 mm
- 1 measurement cable (red), insulated connectors on both sides, length 900 mm
- 1 measurement cable (black), insulated connectors on both sides, length 900 mm
- 2 test probes (red / black) with 4 mm banana plugs and non-contact caps

Weight: 0,850 kg.
